Resolved: To submit NEUTRAL with comments:

- It is a very dense development - luxury lodges need space and privacy.
- The site is a landfill site that was unmonitored during its operation, usually land fill sites when completed are sealed with an impervious layer of an inert compound such as clay to completely seal it in to prevent escape of toxins and noxious substances. Why is this one having its surface disturbed? Have the effects of possible air pollution on the school and village been considered?
- The proposal states that the chalets will be sold / leased out - there needs to be an occupancy restriction placed on them. It is an application for a Holiday Park and not permanent homes.
- No drawings are available of the existing site to show the current layout and what will happen to the existing building.
- Scale and location of the screening - It is too close to the road and is more than 2m high. Screening of the site should be appropriate and natural and not the mounting of a bund. Great-crested newts are present on the site as noted in the Ecology report.
- The road is currently a 60mph speed limit road and the splay is not considered to be wide enough.
